Thicker Fog

by MiaQc

Summary

A short one-shot about the game Fear Equation. The engineer grieves while outside the Fog grows thicker.

- A translation of Brouillard Plus Épais by MiaQc

The train engineer grieves as the Fog outside grows thicker. He knows that the coming night will be one of horror for his passengers. He has given orders to build defenses but there are not enough materials for all the wagons. Hoping that no one will die of fear tonight, he lies down on the bed and closes his eyes.
